

Norwii Compatibility Guide

Applicable models: N99, N86

[1] The test results show the compatibility of the default button functions with widely used operating systems and commonly utilized software applications.

[2] If the test results indicate that a certain function is unavailable (x), customers can reprogram the button functions through the Norwii Presenter APP to accommodate their individual preferences.

[3] For Bluetooth Low Energy (BLE) products, connecting to a computer via Bluetooth requires the following:

1) The computer's hardware must support BLE and have a version higher than BLE 4.0; 2) The operating system of the computer must include a compatible BLE driver. It is important to note that many Windows 7 computers are unable to connect via Bluetooth because Microsoft does not officially bring its own BLE driver and the hardware does not support BLE 4.0.

Product Series	Operation System→		Windows 7 and above				macOS			Android 4.4 and above		iOS(Test by iPad)			Linux(Ubuntu 18.04)	ChromeOS

Annotation:

[1] The shortcut keys for the full screen function vary in different operating systems or different presentation software, so we send a series of key combinations to be compatible with various presentation software at the same time. The key combinations

[2] When using Prezi software, please switch the Arrow Up/Arrow Down of the presenter to Page Up/Page Down mode or Arrow Left/Arrow Right mode, because the Arrow Up/Arrow Down mode of the presenter and the scroll wheel mode are smart

[3] Prezi software does not have a shortcut key for Full Screen.

[4] The earliest version of Microsoft Office utilized for this test was Microsoft Office 2003.

[5] "Virtual Laser " is to use the "Laser Pointer" function of Microsoft PowerPoint. Only Microsoft Office 2010 or later support the "Laser Pointer" function. The shortcut key is Ctrl + P.

[6] Prefix 'APP' indicates that this function is supported by Norwii Presenter APP.
